

BibTeX in action

Martin J. Osborne

2008-1-13

1 Introduction

This document illustrates the use of BibTeX. You may want to refer to Arrow et al. (1961) or Aliprantis & Border (1994) or Maskin (1985). Or you may want to cite a specific page in a reference, like this: see Maskin (1985, p. 199). Or perhaps you want to cite more than one paper by Maskin: Maskin (1985). Or you want to make a parenthetical reference to one or more articles, in which case the `\citealt` in the `te.bst` bibliography style omits the parentheses around the year (Arrow et al. 1961).
